

Education

B.A. Computer Science	Rutgers University	2014–2018
-----------------------	--------------------	-----------

Work Experience

Independent Work		2025–2026
------------------	--	-----------

- Took courses through Anthropic to learn how to best integrate AI agents into my development workflow. Certificates for the courses I took are available on my [LinkedIn profile](#).
- Took courses through Frontend Masters.
- Studied APIs, networking, and system design using books like “API Design Patterns” and “High Performance Browser Networking”.
- Learned more about DevOps. Mainly Nix, containerization, and CI.
- Worked on several open-source side projects, mainly utilities for the Nix ecosystem.

Disability Leave		2022–2024
------------------	--	-----------

Mid-Level Software Engineer	Squarespace	2019–2021
-----------------------------	-------------	-----------

- Helped develop a new Content Management System.
- Contributed to several other back-end services such as the social accounts integration, website analytics platform, search platform, etc.

Software Engineering Intern	Meta (Facebook)	Summer 2018
-----------------------------	-----------------	-------------

- Developed a web application to automate the onboarding of other teams onto the message/notification delivery platform for Messenger.

Data Engineering Intern	Pinterest	Summer 2017
-------------------------	-----------	-------------

- Saved developers time by making a web application to automate data pipeline setup for new Kafka topics.

ML Research Assistant	Rutgers University	2017–2018
-----------------------	--------------------	-----------

- Developed SVM classifiers for detecting road types based on the type of traffic that they receive.

Teaching Assistant	Rutgers University	2016–2017
--------------------	--------------------	-----------

- Led five classes of 15 students each for Introduction to Computer Science.
- Conducted workshops, provided tutoring, assisted with debugging, and graded assignments.

HackNY Fellow / SWE Intern	HackNY / Skillshare	Summer 2016
----------------------------	---------------------	-------------

- Worked across the front end and back end to add new features to the site.

Tutor	Rutgers University	2015–2018
-------	--------------------	-----------

- Tutored students and helped them debug their software projects.

Software Engineer	Rutgers University	Summer 2015
-------------------	--------------------	-------------

- Helped develop software for grading Chemistry and Mathematics quizzes.

Skills

Areas	Full-Stack Web Development, Web APIs, CLIs, DevOps
Technologies	Spring, Flask, React, Nix, MongoDB, Elasticsearch
Languages	Python, TypeScript, JavaScript, Java, HTML, CSS, Bash, C, PHP, Hack
Other	Mentorship, Conducting Interviews

Projects

seenIt	A web application for choosing interesting detours to take during a road trip.
Tabbo	A browser extension for managing tabs.
Shrednought	A first-person action game that uses a real guitar as a controller, built with Unity.
cache-nix-gc-roots-action	A GitHub action for caching the Nix store between workflow runs.
