

Education

B.A. Computer Science	Rutgers University	2014–2018
-----------------------	--------------------	-----------

Work Experience

Independent Learning		2024–2026
----------------------	--	-----------

- Took courses through Frontend Masters
- Studied APIs, networking, and system design using books like “API Design Patterns” and “High Performance Browser Networking”
- Learned more about DevOps. Mainly Nix, containerization, and CI
- Worked on several side projects, mainly utilities for the Nix ecosystem
- Practiced integrating AI agents into my development workflow

Disability Leave		2022–2023
------------------	--	-----------

Mid-Level Software Engineer	Squarespace	2019–2021
-----------------------------	-------------	-----------

- Helped develop a new Content Management System.
- Contributed to several other back-end services such as the social accounts integration, website analytics platform, search platform, etc.

Software Engineering Intern	Meta (Facebook)	Summer 2018
-----------------------------	-----------------	-------------

- Developed a web application to automate the onboarding of other teams onto the message/notification delivery platform for Messenger.

Data Engineering Intern	Pinterest	Summer 2017
-------------------------	-----------	-------------

- Saved developers time by making a web application to automate data pipeline setup for new Kafka topics.

ML Research Assistant	Rutgers University	2017–2018
-----------------------	--------------------	-----------

- Developed SVM classifiers for detecting road types based on the type of traffic that they receive.

Teaching Assistant	Rutgers University	2016–2017
--------------------	--------------------	-----------

- Led five classes of 15 students each for Introduction to Computer Science.
- Conducted workshops, provided tutoring, assisted with debugging, and graded assignments.

HackNY Fellow / SWE Intern	HackNY / Skillshare	Summer 2016
----------------------------	---------------------	-------------

- Worked across the front end and back end to add new features to the site.

Tutor	Rutgers University	2015–2018
-------	--------------------	-----------

- Tutored students and helped them debug their software projects.

Software Engineer	Rutgers University	Summer 2015
-------------------	--------------------	-------------

- Helped develop software for grading Chemistry and Mathematics quizzes.

Skills

Areas	Full-Stack Web Development, Web APIs, CLIs, DevOps
Technologies	Spring, Flask, React, Nix, MongoDB, Elasticsearch
Languages	Python, JavaScript, Java, HTML, CSS, Bash, C, PHP, Hack
Other	Mentorship, Conducting Interviews

Projects

seenIt	A web application for choosing interesting detours to take during a road trip.
Tabbo	A browser extension for managing tabs.
Shrednought	A first-person action game that uses a real guitar as a controller, built with Unity.
notes-cli	A CLI for remembering shell commands.
cache-nix-gc-roots-action	A GitHub action for caching the Nix store between workflow runs.
